**Seminar on Cyber Security**

**Speakers:** Mr Kok Tin Gan, Partner, Global Risk Assurance of PwC

**Date:** Tuesday, 22 March 2016

**Time:** 5:30 p.m. - 7:00 p.m.

**Venue:** PricewaterhouseCoopers, Conference Room 2101 & 2102, 21/F Edinburgh Tower, 15 Queen's Road Central, HK

A number of high profile cyber-attacks have taken place in the global financial services industry over the past years, resulting in the loss and theft of millions of customer records, numerous documents and other confidential data. Using relatively simple tools, hackers have been able to generate significant profits from the sale of personal records, as well as limit access to company websites and alter company records for personal gain; such as altering fund values. This has highlighted the need for businesses to consider their cyber security strategies in a constantly changing threat environment.

Everyone within the financial services industry has a responsibility to safeguard the personal information and other confidential data that they deal with. PwC's cyber security specialist will share their broad experience in helping clients prioritise what should be protected to develop proportionate cyber strategies that support everyone - from individuals providing personal information online, through to corporations which manage complex databases across multiple territories.

We are pleased to have Mr Kok Tin Gan, Partner, Global Risk Assurance of PwC to talk to our members. Kok-Tin has over 12 years of experience. His key areas of expertise include Cyber security strategy and framework, IT governance, IT security framework, application and data security, IT risk, security management, security / technology architecture and ethical hacking. Kok-Tin is well versed in a number of security technology solutions (such as identity and data loss prevention, firewalls, security analytics, etc.), attack / cybercrime scenarios, payment security, and security assessment framework, relevant technology regulatory guidelines (e.g., HKMA, SFC, MAS, AMCM's guidelines and other guidelines in the Asia Pacific region), using both automated and manual penetration testing techniques, source code security review tools, and risk management procedures pertaining to security assessment. Kok-Tin has led ~300 security assessment / transformation engagements of small to large size and has worked across different continents including, Asia, America, Europe and Africa.
